

NEWTON
COMMUNITY SCHOOL DISTRICT

Planning for the Future

Enrollment Analysis

December 2023

RSP Quick Facts:

Founded in 2003
Professional educational planning firm
Expertise in multiple disciplines (GIS, Planning, Facilitation)
Over 20 years of planning experience
Over 80 years of education experience
Over 20 years of GIS experience
Projection accuracy of 97% or greater

RSP Clients:

RSP was started with the desire and commitment to assist school districts in long-range planning.
RSP has served over **130** clients in:

Arkansas	Minnesota	South Dakota
Colorado	Missouri	Tennessee
Iowa	Nebraska	Wisconsin
Illinois	North Dakota	
Kansas	Oklahoma	

RSP Planning Team:

Robert Schwarz, CEO

Military, County, City, and School District Planner
University of Kansas – Master of Urban Planning (MUP)
American Institute of Certified Planners (AICP)
Accredited Learning Environment Planner (ALEP)

Ginna Wallace, Planner

University of Kansas – Master of Urban Planning (MUP)
American Institute of Certified Planners (AICP)

RSP Recent Projects:

Bondurant-Farrar Community School District
Enrollment Analysis, 2022/23

Southeast Polk Community School District
Enrollment Analysis, 2023/24

Marshalltown Community School District
Enrollment Analysis, 2020/21

Our Partners:

Expectations

Thank you to Newton Community School District, Jasper County, City of Newton, State of Iowa Census Bureau, and ESRI for assisting in this analysis!

Helpful Hints to Read the Report:

- Slides that have the flagged star symbol are SIGNATURE SLIDES and are the most important variables in this unique analysis
- Each variable is analyzed as an indicator of future student population. Use the PLUS (student growth) and MINUS (student loss) icons to note how each indicator contributes to the analysis:
- Click the APPENDIX symbol on a page to reference additional analysis on this topic

Timeline

Project timeline is a result of ensuring student data could represent as close as possible to the Official County Data with attributes that would allow RSP to forecast enrollment at a parcel level geography.

Findings

The findings were not focused on supporting or contradicting any past internal or outsourced studies. This analysis is based on data, data, and more data.

Study

This study factored in many different data sets to provide data driven analysis that is the foundation to the RSP Statistical Forecast Model (SFM).

Change

Enrollment change in the community is influenced by, but not limited to, the birth rate, demographics, types of development and/or housing affordability.

Facts:

The study does not provide specific information about which site would be best suited for a new facility or for that matter should the district build any new facility – this analysis is one portion of how to make that decision

This analysis is based on the same grade configuration and educational programming expectations the patrons have for each student

Projecting enrollment is not a science – like life in general some assumptions happen that may lead to greater enrollment while others toward a smaller enrollment

The goal of this study is to help the board, administration, and public understand how to make the best decision for the students at the classroom level.

Discussion Points

HELPFUL HINTS TO READ THE REPORT:

Slides that have the flagged star symbol are SIGNATURE SLIDES

PLUS: indicator of student growth

MINUS: indicator of student loss

100,000 Foot Perspective

An overview of what is most notable for your school district, students, and community.

District wide enrollment forecasted to decrease by about 115 students to be about 2,650 by 2028/29

- **Elementary forecasted to decrease by about 10 students and enroll almost 1,080 total ES students**
- **Middle School forecasted to decrease by over 25 students and enroll under 800 total MS students**
- **High School forecasted to decrease by almost 80 students and enroll under 800 total HS students**

The district is reviewing elementary facilities and will begin working on a strategic plan to better utilize facilities:

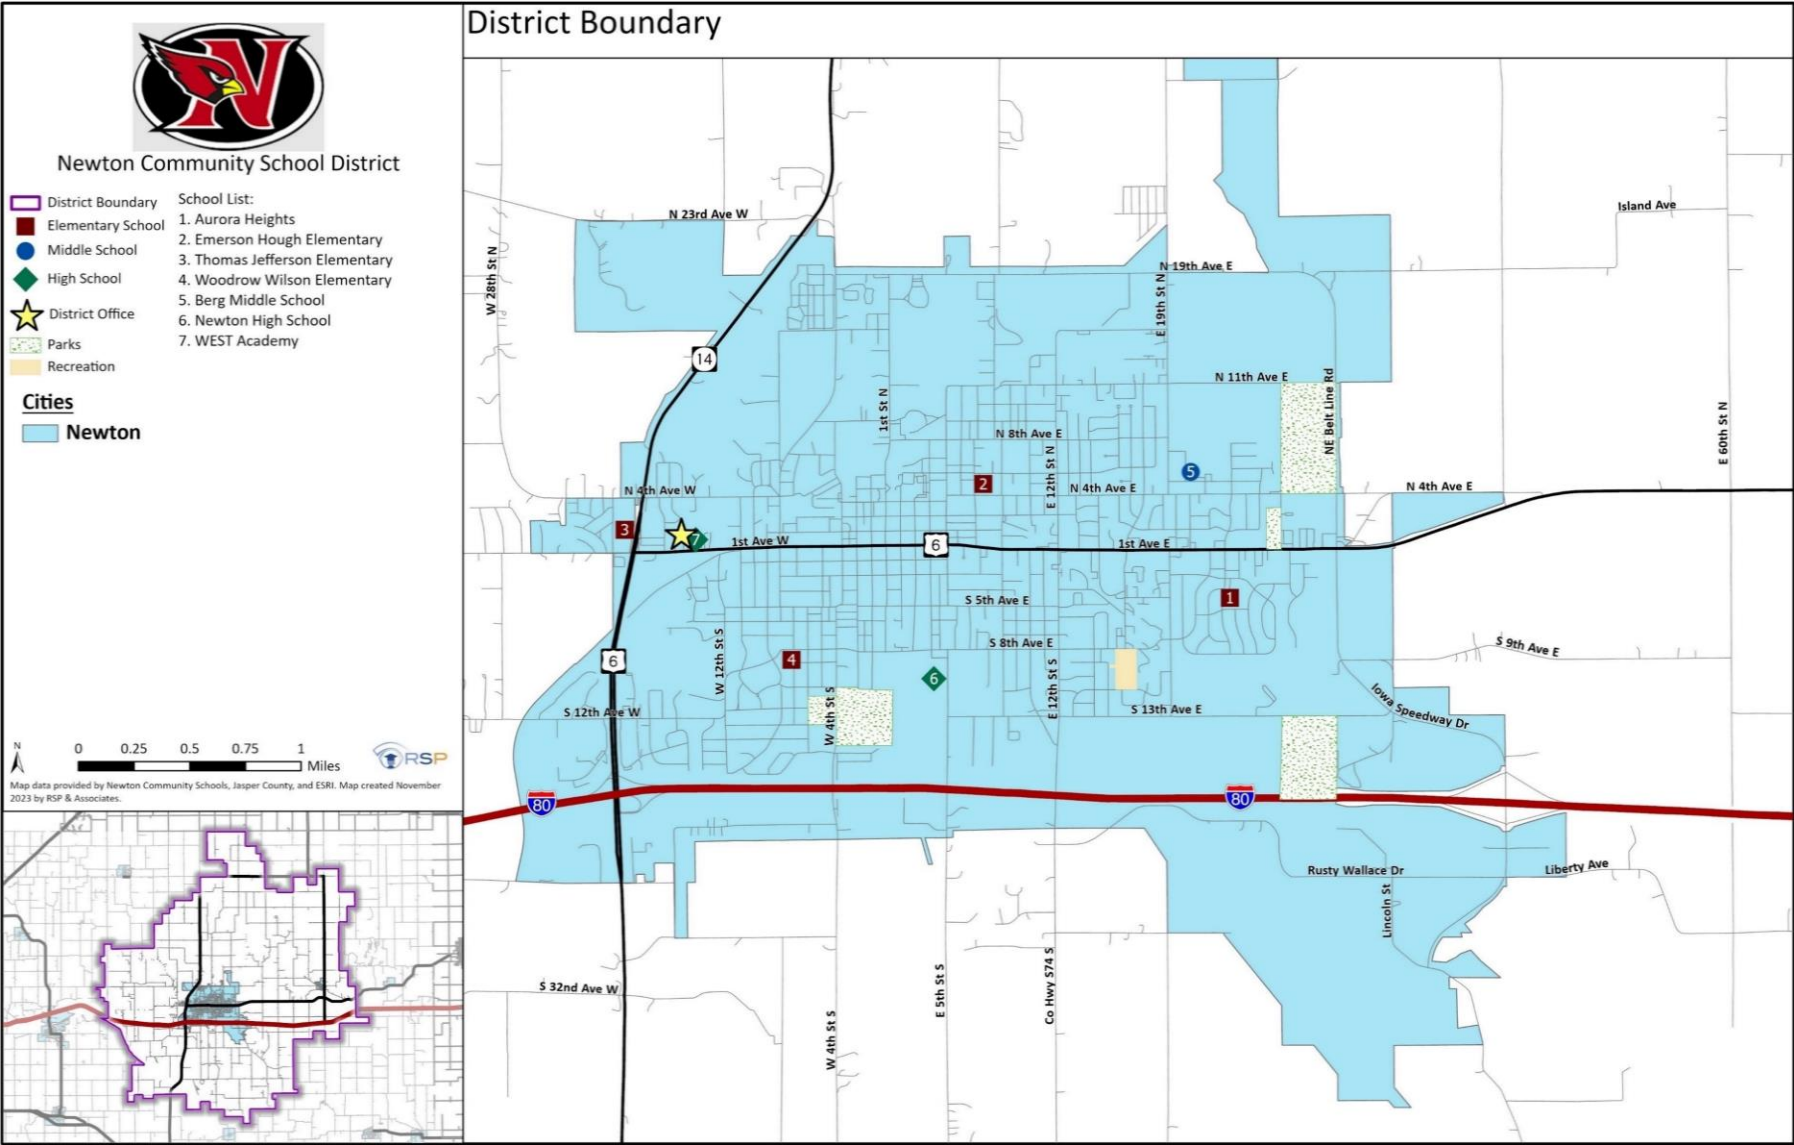

- Thomas Jefferson, Aurora Heights, Woodrow Wilson, and Emerson Hough

Factors of residential and economic growth were analyzed in this forecast

- New residential inventory has been minimal the last decade
- There are over 1,000 potential units that could be added in the district over the next decade
- Job and economic growth is expected in the region as TPI Composites reopens

Elementary School Attendance Areas

Map data provided by Newton Community Schools, Jasper County, and ESRI. Map created November 2023 by RSP & Associates.

RSP Planning Areas Map

Sophisticated Forecast Model

Built-Out $S_{c,t,x} = S_{c-1,t-1,x} * GC$

Let:

- S = The number of students, either an actual count or a projected count
- x = A subscript denoting an attendance area in the School District
- c = Grade level
- t = Time (years)
- GC = Growth component either modeling enrollment increase or decrease based on historical information, expressed as a real number

Developing $S_{c,t,x} = S_{c-1,t-1,x} + (BP_{t,x} * R_{c,x})$

Where: $BP_{t,x} = \left(\frac{(CP_x)(BT_x)(A_x)}{\sum_x (CP_x)(BT_x)(A_x)} \right) * CT$

Let:

- S = The number of students, either an actual count or a projected count
- x = A subscript denoting an attendance area in School District
- c = Grade level
- t = Time (years)
- BP = Building permit forecast as given by the Building Permit Allocation Model (BPAM) model
- R_{c,x} = Student Enrollment ratio of cohort c in planning area x
- CP = Capacity of a planning area as expressed by available housing units
- BT = Building history trend of planning area
- A = An index which models the likelihood of development
- CT = Building permit control total forecast

The SFM is...

- a social science... not an exact science; it identifies behavior trends to determine the propensity of them to be recreated
- valuable in how our team created and analyzes the geography at a planning area level for any commonality which while help produce an accurate forecast

Some variables examined for each planning area (but not limited to) are...

- natural cohort (district data)
- planning area subdivision lifecycle (a RSP variable)
- the value of homes (county assessor data)
- type of residential units like single-family, multi-family, townhome, mobile home, etc. (county assessor data)
- year units were built
- estimated female population (census data)
- estimated 0-4 population (census data)
- existing land use (county and city data)
- future land use (county and city data)
- capital improvement plan (county and city data)
- future development (county and city data)
- in-migration of students (district data) & out-migration of students (district data)

This is the **central focus** of everything RSP does.

The model is based on what is happening in a school district. The best data is statistically analyzed to provide an accurate enrollment forecast. The District will be able to use RSP's report and maps to better understand demographic trends, school utilization, and the timing of construction projects.

Each variable is analyzed as an indicator of the future student population:

-  Indicator of Student Growth
-  Indicator of Student Loss

Birth Rate Information

Jasper County Iowa Live Births and Newton Kindergarteners 5 Years Later

Calendar Year	# Live Births	Birth Change	% Birth Change	School Year	# Kdg	%Kdg of Live Births
2005	474			2010/11	251	53.0%
2006	402	-72	-15.2%	2011/12	251	62.4%

Source: Iowa Department of Public Health (IDPH) and Newton Community School District

- Low Range
- High Range

Live Birth Observations

- Tracks the number of county live births and the corresponding number of kindergarten students in five years later
- The number of live births have decreased the past two years with less than 400 per year (3-year average of 13 less live births per year)
- Kindergarten enrollment has varied between 177 to 252 students per year
- Kindergarten was the lowest this year with 177 students (44% of live births)
- The kindergarten classes moving forward are forecasted to be between:
 - Low End: 158 to 180 students
 - High End: 206 to 235 students

Main Takeaway: The decline of live births in the Jasper County can potentially result in smaller kindergarten classes. To keep similar or greater enrollment will require an increased in the market share of future kindergarten students. RSP recommends continuing to monitor this variable for more understanding on demographic trends as propensity of Jasper County live births enrolling in Newton Community School District.

Past Enrollment by Grade

Observations:

- Largest K-12 class in 2023/24 – 12th grade with 225 Students
- Smallest K-12 class in 2023/24 – Kindergarten 177 students
- Graduating senior class is larger than the incoming Kindergarten class which will decrease total enrollment
- Largest historical increase was from 2016/17 to 2017/18 with increase of 6.0%
- Largest total enrollment since 2005/06 was in 2005/06 with 3,271 students
- The district decreased by 88 students from last year (-3.1%)

Cohort Student Change

Observations:

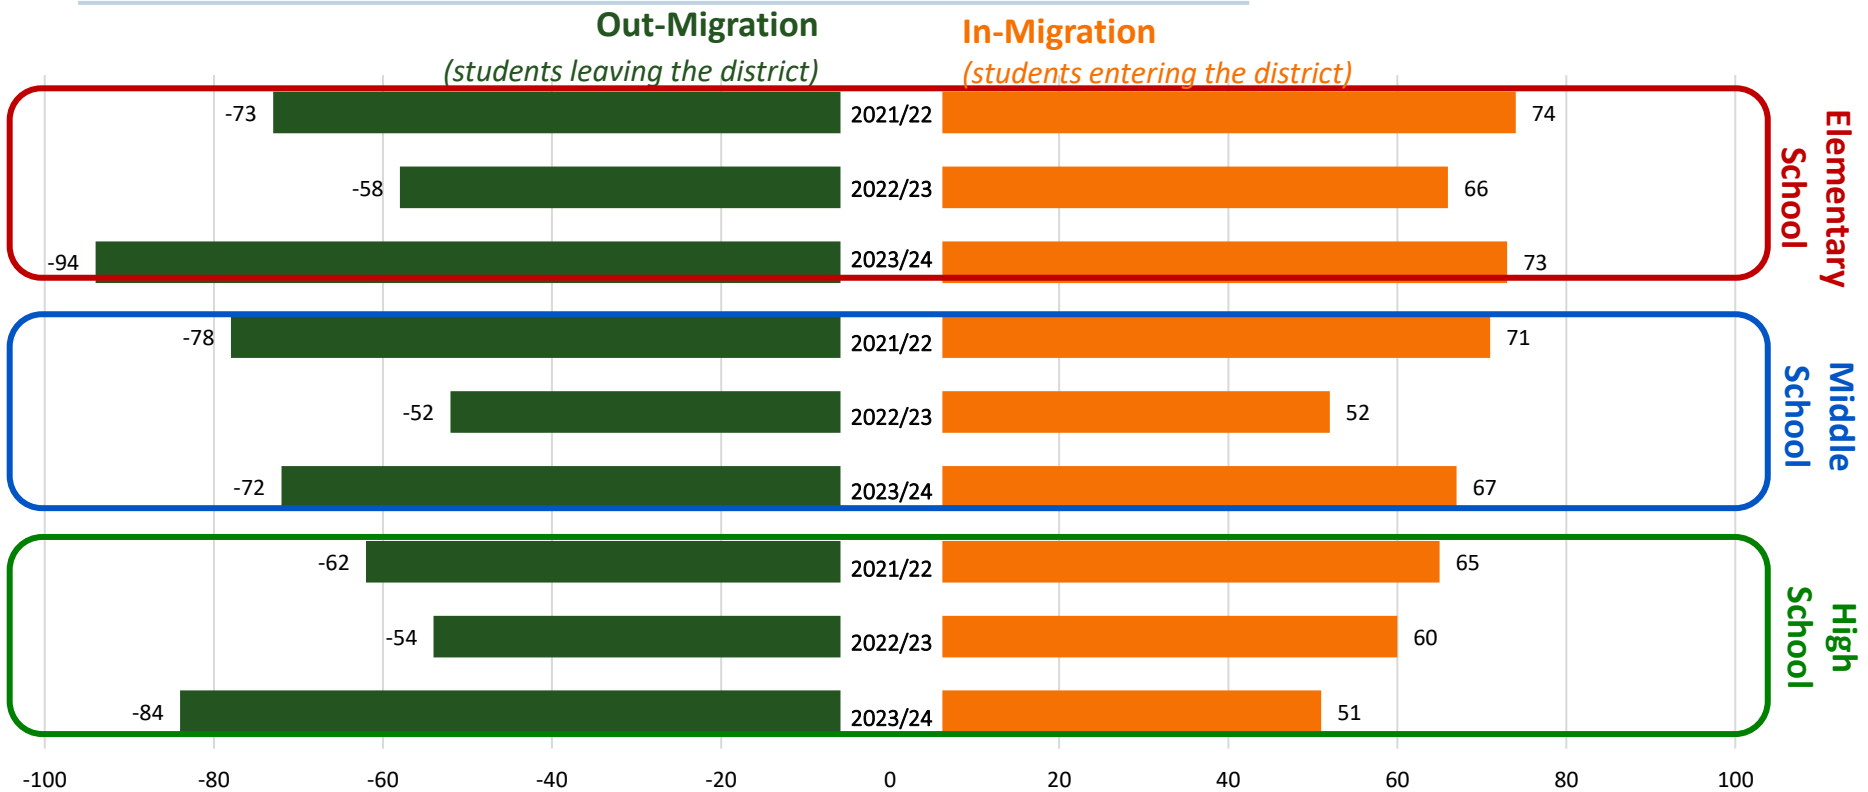

- Largest 3-year average K-12 class cohort increase – 1st to 2nd grade **(+5.3)**
- Largest 3-year average K-12 class cohort decrease – 10th to 11th grade **(-8.7)**
- Overall percent change from previous year of -3.1% - decrease of 88 students
- Instructional Modality will have to be monitored to determine if the students who are not attending the district still reside in the district and if or how many return to receive services in the future years

3-Year Student Migration Trend

Source: Newton Community School District and RSP

Definition

Out-Migration: Shows number of students in grade K to 11th that were attending the District in the previous year, but are not attending the District in the current year.

In-Migration: Shows number of students in grade 1st to 12th that are attending the District in the current year, but were not attending the District in the previous year.

Observations

- 2021/22 lost 213 students and gained 210 students; **NET: -3**
- 2022/23 lost 164 students and gained 178 students; **NET: +14**
- 2023/24 lost 230 students and gained 191 students; **NET: -59**

Main Takeaway:

The district had a negative net loss of transfer students this year. High school saw a larger out-migration than the past two years.

Out of District Student Analysis

Out of District Students by Residing School District (top 3)

Total Out of District Students per Year

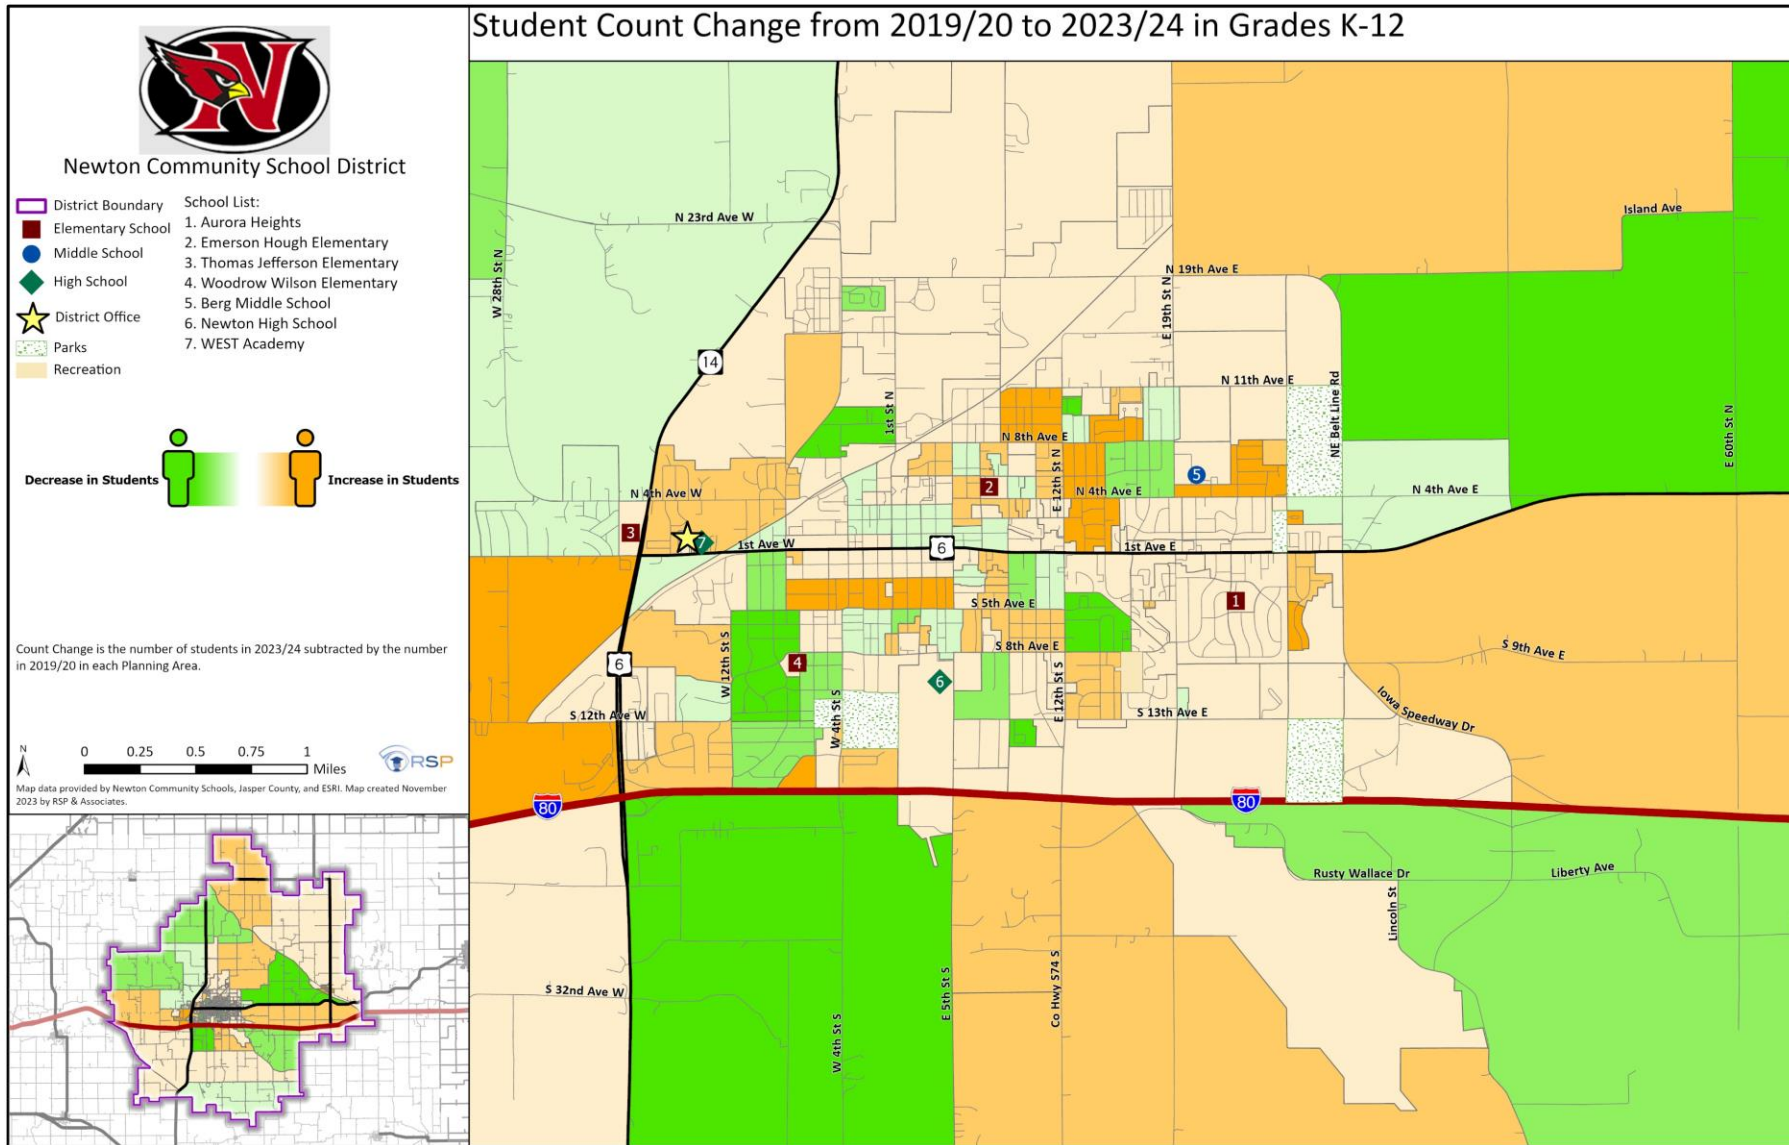

Observations:

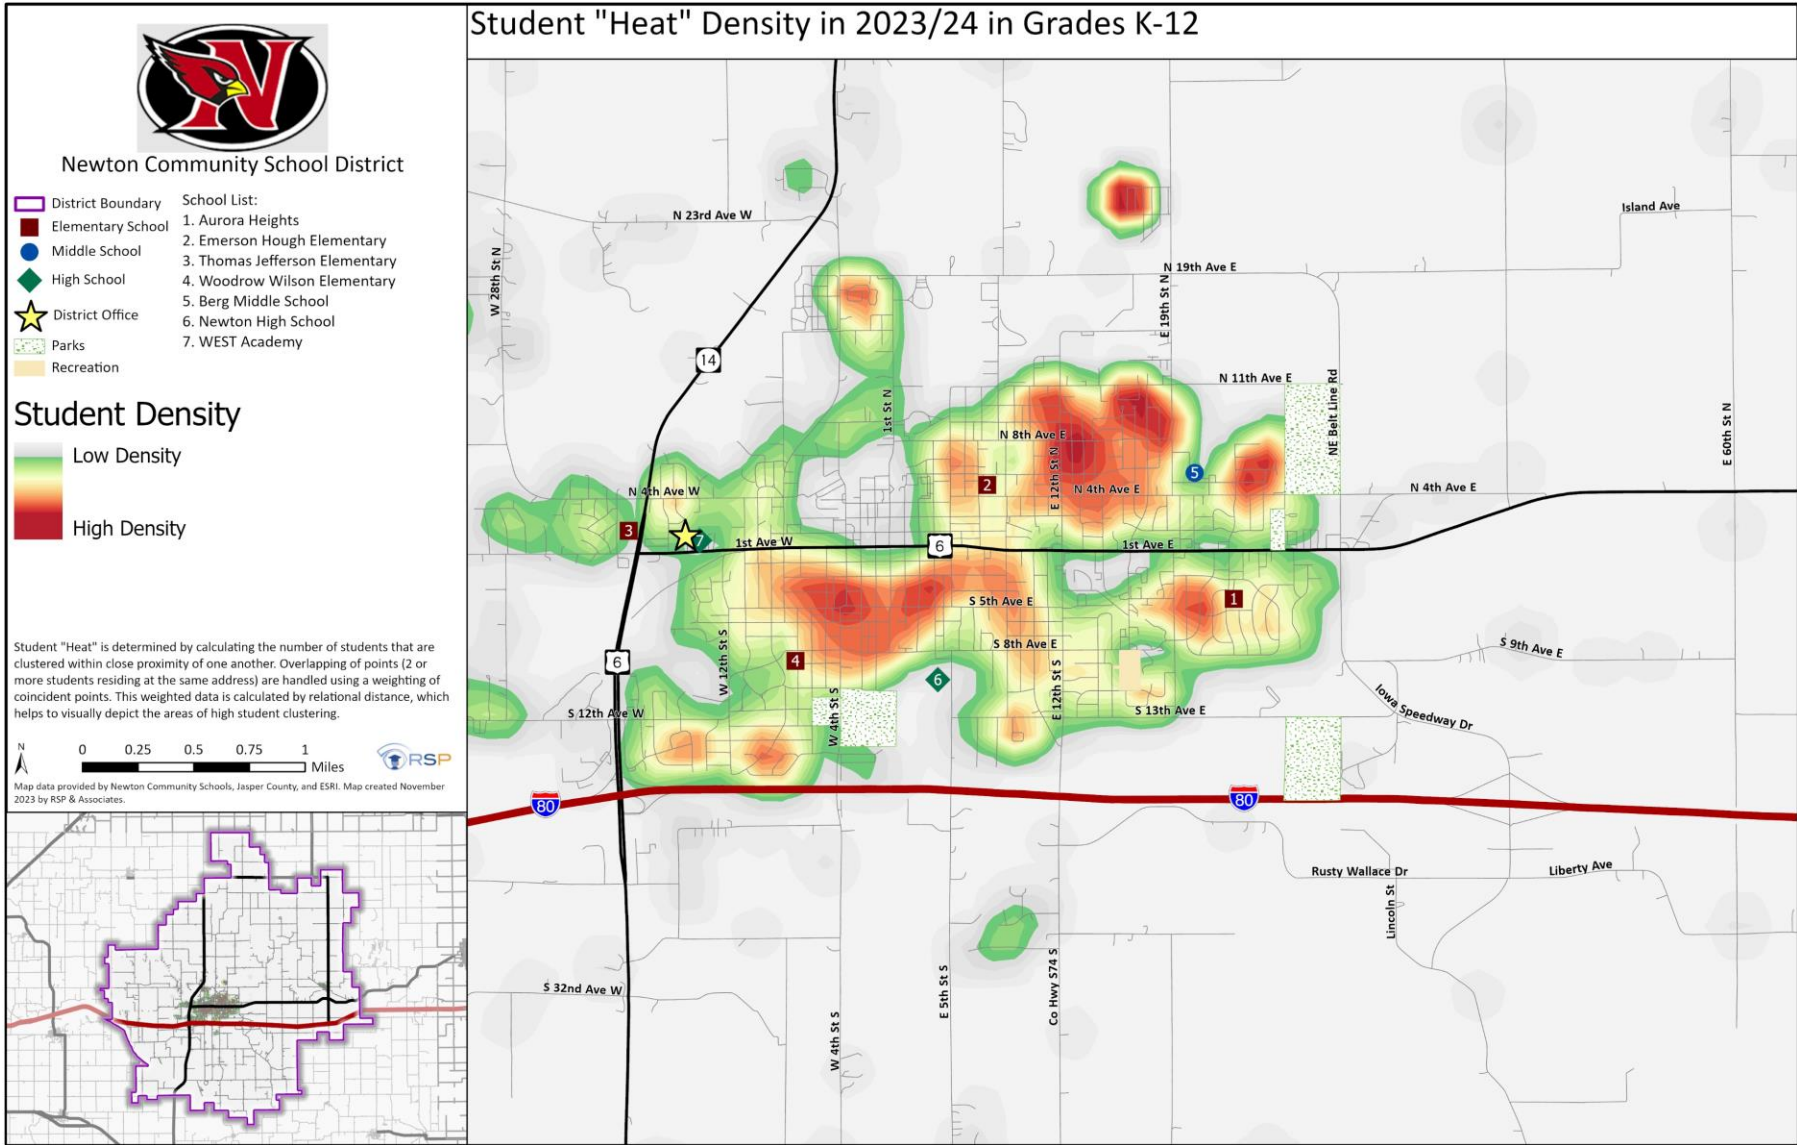

- Open enrollment decreased slightly in 2021/22 but has increase back to around 50 students
- Prairie City Monroe Community School District tends to contribute the largest share of open enrollment students
- Grinnell-Newburg Community School District open enrollment has decreased over the past five year

Source Newton Community School District and RSP

Student Count Change Map

Heat Map

Heat Density Change Map

Newton Community School District

- District Boundary
- Elementary School
- Middle School
- High School
- District Office
- Parks
- Recreation

- School List:
1. Aurora Heights
 2. Emerson Hough Elementary
 3. Thomas Jefferson Elementary

 5. Berg Middle School
 6. Newton High School
 7. WEST Academy

Student "Heat" is determined by calculating the number of students that are clustered within close proximity of one another. Overlapping of points (2 or more students residing at the same address) are handled using a weighting of coincident points. This weighted data is calculated by relational distance, which helps to visually depict the areas of high student clustering.

Map data provided by Newton Community Schools, Jasper County, and ESRI. Map created November 2023 by RSP & Associates.

Student "Heat" Density Difference from 2019/20 to 2023/24 in Grades K-12

Enrollment Observation and Conclusion

RSP & Associates monitors almost 250 planning areas for demographic, development, and enrollment data sets

Live births in Jasper County have decreased the last two years – *indicator of student loss*

District enrollment decrease by 88 students from last year – *indicator of student loss*

- Pandemic cohort recovery was non-existent
- Most grade levels decrease as they work their way through the system
- Average class sizes have all decrease over the past decade

Graduating senior classes are larger than incoming kindergarten classes – *indicator of student loss*

District had a negative migration trend this year with more students migrating out – *indicator of student loss*

Greatest student density is west of the middle school

Open enrollment trends should continually be analyzed as change to open enrollment policy have impact on enrollment outlook.

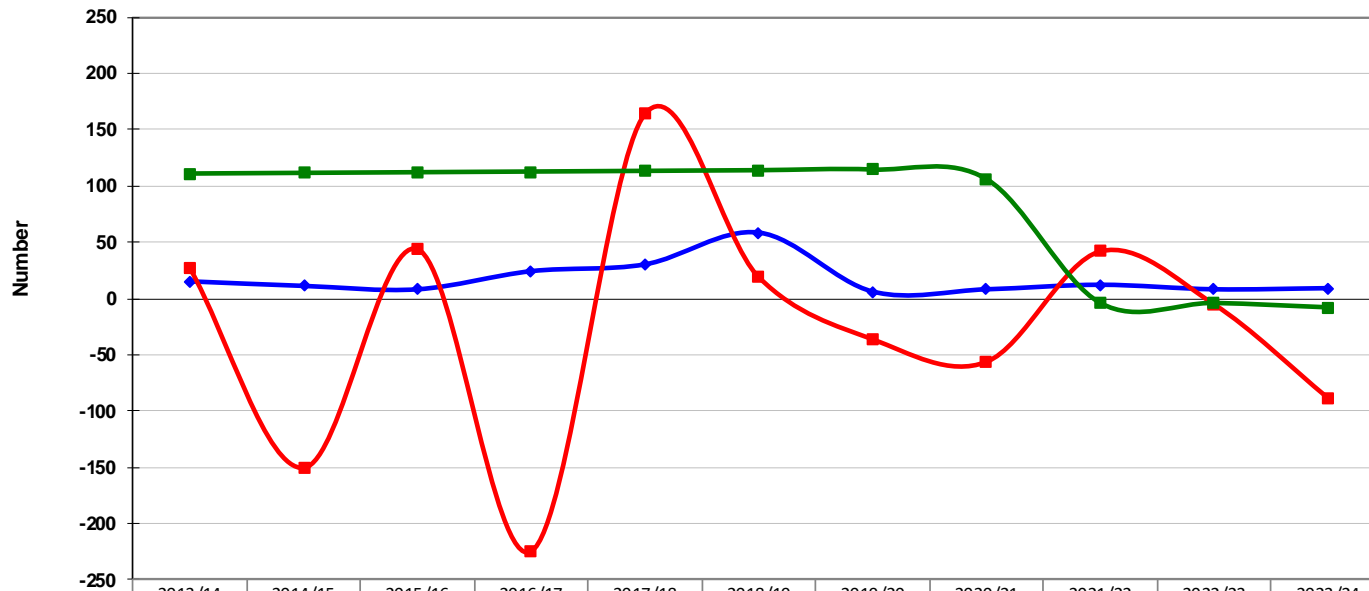

PART 2 DEVELOPMENT

- Population, Development, & Enrollment Trends
- Yield Rate
- Housing Market Maps & Data
- Potential Growth Analysis

Population, Development, & Enrollment

	2013/14	2014/15	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24
— Certificate Occupancy	15	11	8	24	30	58	6	8	12	8	9
— Enrollment Change	27	-150	44	-224	164	19	-36	-56	42	-5	-88
— Population Change	111	112	112	113	113	114	115	106	-4	-4	-8

Benchmark data to determine if there is a correlation between:

- Population change
- Building activity
- School enrollment

Source: Newton Community School District, Jasper County, and US Census

Graphic Explanation

- **BLUE LINE:** Building activity was at its greatest in 2018/19; the past two years has seen minimal development
- **GREEN LINE:** Census data indicates a slightly decreasing population
 - Population shows the estimate growth of the whole decade
 - New decennial census often affect year-to-year change
- **RED LINE:** Student enrollment has been generally decreasing year to year
 - Enrollment has decreased for 6 of the past 10 school years

Student Yield Rate

Table Legend

-  +3 and greater from District Average
-  -3 and greater from District Average

Single-Family Yield Rate:	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Avg
Aurora Heights Elementary School	11	12	11	10	12	11	12	11	12	12	12	10.89

Woodrow Wilson Elementary School	13	14	13	12	11	12	13	12	12	13	12	13.68
District (K-4):	12	13	12	11	12	12	13	12	13	13	12	12.47

Source: Jasper County and Newton Community School District

Single-Family Yield Rate Observations

- Table shows the number of students per 100 single-family (SF) units by year and by elementary boundary
- District sees on average 12 K-4 students per 100 single-family households
- Emerson Hough has the largest 2023 SF yield rate with 14 students per 100 single-family households
- Thomas Jefferson has the smallest 2023 SF Yield rate with 11 students per 100 single-family households
- Adding new housing can typically increase the yield rate – there were 116 single-family homes built from 2013 to 2023

Multi-Family Yield Rate:	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Avg
Aurora Heights Elementary School	9	7	7	7	8	6	6	6	6	7	6	7.95
Emerson Hough Elementary School	14	15	17	17	14	17	9	9	9	9	10	12.53
Thomas Jefferson Elementary School	16	13	12	11	12	11	12	11	10	9	10	12.79
Woodrow Wilson Elementary School	10	11	11	10	11	10	8	6	5	6	8	9.05
District (K-4):	13	11	11	11	11	10	9	9	8	8	8	10.74

Source: Jasper County and Newton Community School District

Multi-Family Yield Rate Observations

- Table shows the number of students per 100 multi-family (MF) units by year and by elementary boundary
- District sees on average 10 students per 100 multi-family households
- Emerson Hough and Thomas Jefferson have the largest 2023 MF yield rate with 10 students per 100 multi-family households
- Aurora Heights has the smallest 2023 MF yield rate with 6 students per 100 multi-family households
- Adding new housing can typically increase the yield rate – there were 71 multi-family homes built from 2013 to 2023

Main Takeaway:

The single-family district yield rate has been stable around 12 students while the multi-family yield rate has been decreasing from 13 to 8 students

Development Activity Over Time

New V.S. Existing Units by Decade Built

	1939 or Earlier	1940-1949	1950-1959	1960-1969	1970-1979	1980-1989	1990-1999	2000-2009	2010-2019	2020-2023
■ Number of New Units in Time Period	2,617	412	1,439	887	1,179	502	983	561	198	37
■ Number of Existing Units		2,617	3,029	4,468	5,355	6,534	7,036	8,019	8,580	8,778

Source: Jasper County and ESRI

Observations:

- Table has been created to illustrate the number of units by year built
- The average number of units built per year from 2010 to 2019 (19.8 per year) is lower than from 2000 to 2009 (56.1 per year)
- The decade with the most units built was 1970 to 1979 with over 1,000 new units
- Building activity will need to increase a lot to have a significant impact on enrollment
- The average year for all units built was 1951 and the median year built in 1955

Corner of W28th and HWY F48	Single-Family	10 Year	0	264
Corner of W4th and S 20th Ave	Single-Family	10 Year	0	76
Current Total:			42	293
5 Year Total:			1	333
10 Year Total:			2	443
Grand Total:			45	1069

Disclaimer: The market demand and property owners desire to build guides the timing and type of development. Some growth areas may require infrastructure improvements. There is no guarantee any of these growth areas will develop or that other areas not shown as a growth area will develop

Source: Jasper County, City of Newton, and RSP

Observations:

- Growth areas are created from existing land use, future land use, capital improvement plan, zoning, and city staff input
- Over 600 total units are identified for potential development in the next decade. Development activity will need to increase for this to be attained.
 - **Green:** identifies where development activity is happening (222 units)
 - **Yellow:** identifies possible areas that could develop within a 5-year range (290 units)
 - **Purple:** identifies possible areas that could develop within a 10-year range (103 units)

Regional Economic Growth

- TPI Composites plans to reopen manufacturing plant
 - Plans to restore 700-employee workforce
 - Signed a 10-year lease agreement to supply wind turbine blades to GE Renewable Energy
 - Production is expected to begin in 2024

<https://www.desmoinesregister.com/story/money/business/2022/11/04/tpi-composites-newton-iowa-10-year-lease-reopen-plant/69619151007/>

Development Observation and Conclusion

Over 1,000 units identified for potential development within the next 10+ years

Building activity has been decreased the past couple of years

- Opportunities of residential growth still exist – however the speed of the activity is forecasted to continue decreasing
- Monitor local factors that may affect development timing and economic outlook to gauge how the new decade of residential growth will play out

Single-family residential has the highest propensity to have school aged students, yield rates of this development type are higher than that of multi-family

- Single-family units are being developed at a higher rate than multi-family – 2023 saw 12 single-family units built and 5 multi-family units built
- Tracking the types of development is important to understand the yield rate of students for every part of the community – there are varying yield rates with all developments

The most active area of development is north of the Middle School

Residential development will continue if the housing product is affordable and have active residential projects – infrastructure connectivity also plays a role in the desirability and timing of residential development. Potential for a slight decrease in unit production with a national election year (2024).

As of February 2022, construction costs have increased over 100% from August 2020 and supply chain challenges impact the potential of new development and where new developments will occur in the district

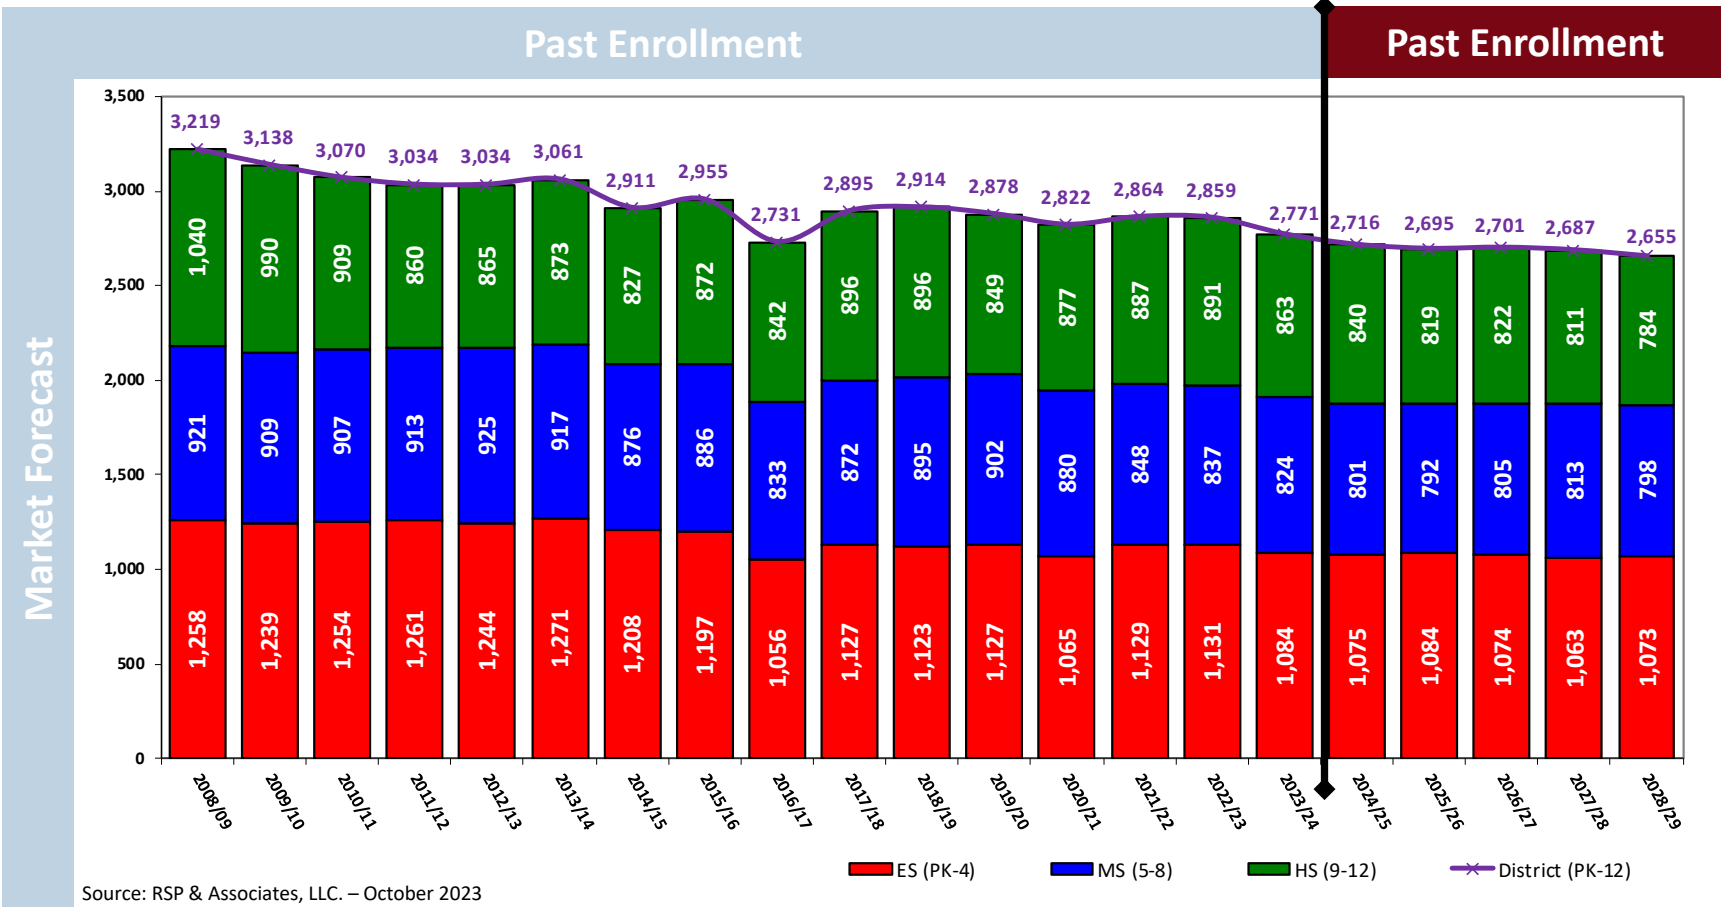

PART 3 PROJECTIONS

- Past, Current, & Future Enrollment
- Building Projections

Past, Current, & Future Enrollment

District-wide enrollment projected to continue decreasing for the next five years. By 2028/29...

- District-wide enrollment forecasted to decrease by 116 students (-4.2%)
- Elementary enrollment forecasted to decrease by 11 students (-1.0%)
- Middle School enrollment forecasted to decrease by 26 students (-3.2%)
- High School enrollment forecasted to decrease by 79 students (-9.2%)

Projection Notes & Clarifications

Past Enrollment is shown three ways:

1. Reside (Based on where a student Resides in relation to the district boundary)
2. Attend (Based on both a student residing in the district and attending and students not residing in the district attending)
3. Reside/Attend (Subset of Reside to know how many of the Reside attend the school based on the attendance area they are assigned to)

Projected Enrollment is shown two ways:

1. Reside (Based on where a student Resides in relation to the district boundary)
2. Attend (Based on both a student residing in the district and attending and students not residing in the district attending)

○ Other Items

- Enrollment Grade Configuration in Student Forecast Model (PK-4, 5-8, and 9-12)
- Open enrollment trends are assumed to follow District policy and follow similar trends as the last few years
- Projection accuracy is limited by the number of years of student data which matches the State enrollment
- Out of District trends are assumed to follow District policy and may continue or may take place like those trends during the projection
- Integrated potential outcomes as a result of potential continued impact of COVID-19
- Housing challenges that may result in a slowdown in new housing starts and challenges with the economy as it adapts to a “New Normal” of supply challenges, cost increases, and other housing policy changes

Projections by Building

Newton School District Enrollment Projections By School (Based on Student Reside)

School	District Capacity	Enrollment Type (Past)	Past School Enrollment				Projections Based on Residence				
			2020/21	2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28	2028/29

		Attend	880	847	837	824	801	792	805	813	798
HIGH SCHOOL TOTAL 9th to 12th	1,315	Reside/Attend	877	887	891	803					
		Reside	877	887	891	863	840	819	822	811	784
		Attend	877	887	891	863	840	819	822	811	784
DISTRICT TOTALS PK to 12th	3,857	Reside/Attend	2,495	2,586	2,618	2,489					
		Reside	2,822	2,864	2,859	2,771	2,716	2,695	2,701	2,687	2,655
		Attend	2,822	2,864	2,859	2,771	2,716	2,695	2,701	2,687	2,655

Item of Understanding:

Elementary Reside past and future enrollment includes PK, while the Attend past and future enrollment factors in that all PK students attend Thomas Jefferson

Source: RSP & Associates, LLC - October 2023

- Note 1: Student Projections are based on the residence of the student.
- Note 2: The Enrollment Model is based on a Head count of students by Planning Area at each facility
- Note 3: Transfers between Facilities are shown with Attend Projections
- Note 4: The Enrollment Model assumes ES(PK-4) MS(5-8) and HS (9-12)
- Note 5: Each planning area is assigned the 2023/24 boundary
- Note 6: School capacity provided by the District
- Note 7: Reside is based on the student home address
- Note 8: Attend is based on which facility the student attends
- Note 9: Res/Att (Reside/Attend) are the students who reside in the attendance area that they have chosen to attend

School Utilization Legend

- Over 100% School Capacity
- Under 70% School Capacity

Projection Observations and Conclusion

Projection Overview

- District is projected to decrease by 116 students, totaling 2,655
- Elementary schools are projected to decrease by 11 students, totaling 1,073
- Middle schools are projected to decrease by 26 students, totaling 798
- High schools are projected to decrease by 79 students, totaling 784

Facilities are likely to see under-utilization (less than 70%) challenges over the next five years.

Driving Themes of Enrollment

1. 2023/24 Student population
 - *Smallest classes in history*
 - *Smaller kindergarten classes than senior classes*
2. Development Activity
 - *Decreasing yield rates*
 - *Minimal development building trends*
 - *Potential new developments require infrastructure improvement and market indication*
3. Migration Trends
 - *Negative student migration*
 - *Cohorts tend to decrease or increase minimally throughout the years*

PART 4 NEXT STEPS

- Moving Forward
- Next Steps & Key Considerations

Next Steps

- ❑ Admin Boundary meetings begin in January 2024
- ❑ Public input is held in February
- ❑ Plan comes back to Board of Education for final adoption in March 2024
- ❑ Discussion for Boundaries and Grade Configuration:
 - Thomas Jefferson
 - Aurora Heights
 - Woodrow Wilson
 - Emerson Hough

2023/24 COMPREHENSIVE BOUNDARY PROCESS

- KEY:**
- Board of Education Action
 - Consultant Assistance
 - Public Input Opportunity
 - Staff Assistance
 - Administration Work

TOP BOUNDARY CRITERIA (11/13/2023 meeting)

1. Students Impacted by Boundary Change
 - *Focus on number of transitions for students*
2. Fiscal Considerations – Operational
3. Neighborhoods/Schools Intact

Key Considerations

The following items will assist the district advance its educational goals:

- Annually review enrollment projections, demographics, and development trends
- District administration and the Board of Education further study the enrollment, demographic, and development information presented
- Utilize the enrollment model to assist with planning for staffing needs at each facility for the following school year which will address how quickly areas are “Regreening” and “Emerging”
- The type of residential development and how affordable it is will determine likely location and number of students
- Annually monitor the impact of future educational programming that will be integrated into each facility to ensure equitable and appropriate space is utilized in the building which will experience enrollment change
- Recent economic indicators have been in-flux (interest rates, housing prices, supply chain). Continued economic changes will impact the likelihood of new people moving into the district and increasing enrollment.
- RSP Enrollment forecasting is based on the best-known information at the time

Key Considerations:

1. Number of live births in Jasper County (continue to monitor)... *see page 11*
2. Size of outgoing senior class (larger) compared to the incoming Kindergarten and PK classes (smaller)... *see page 12*
3. Migration trends (In-Migration tends to be more than Out-Migration)... *see page 14*
4. Development trends and timing of identified projects (1,000-unit production potential next ten years)... *see pages 27-28*

Conclusion

RSP Recommended to continually monitor the following indicators:

Enrollment may decrease more than forecasted if...	Enrollment may increase more than forecasted if...
⊖ Decreasing share of live births	⊕ Increasing share of live births
⊖ Current housing stock does not re-green (continues to age)	⊕ Current housing stock re-greens (turns over)
⊖ Housing development experiences minimal potential growth	⊕ Housing development experience more potential growth
⊖ Economic indicators challenge the ability for new homeowners and affordability aspects of the district	⊕ Economic indicators improve the ability for new homeowners and the affordability aspects of the district
⊖ Demographic shifts in community and/or surrounding communities	⊕ Demographic shifts in community and/or surrounding communities
⊖ Incoming Kindergarten class smaller than outgoing senior class	⊕ Incoming Kindergarten class larger than outgoing senior class

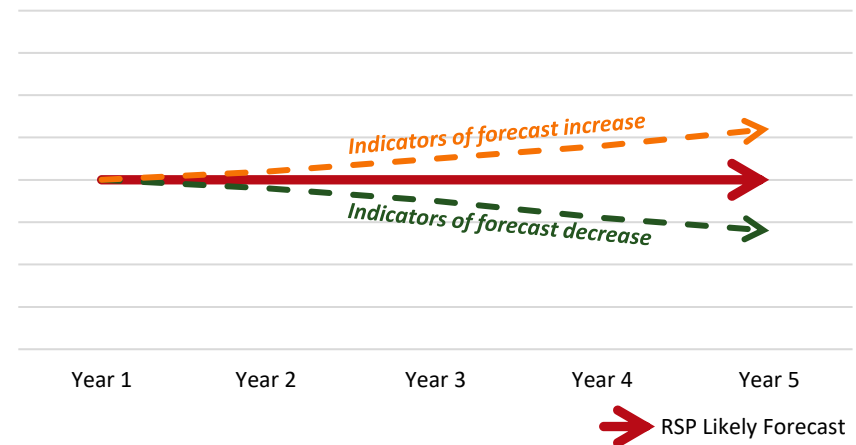

See graphic below to illustrate how the different variables may impact forecasted enrollment outlook:

Main Takeaway:

- These factors are not all positive or negative. Each have a different impact on future outlooks.
- State education policy change may impact enrollment outlook. This analysis assumes policies will continue as they currently operate throughout the projection time frame.
- It is important to continue to monitor these factors – RSP modeling attempts to find the most likely outcome:

The goal of this study is to help the board, administration, and public understand how to make the best decision for the students at the classroom level.

Example of Forecast Evolution

APPENDIX

- Community Demographics
- Intra-transfer Tables
- Student Density Maps

2023/24 Guiding Principles (RSP Modified)

RSP Draft of Guiding Principles:

The following are to be considered:

- The boundary adjustment plan reflects a two-to-three-year transition plan to allow for facility renovation
- The boundary adjustment plan should reflect providing better educational opportunities at each school for there to be an equitable student experience at each school
- The end grade configuration should be: PK to 1st, 2 to 4th, 5 to 8th, and 9 to 12th
- Elementary inventory is reduced to two core facilities by 2025/26
- Attendance boundaries are modified over the next two to four years to allow for building renovations
- Building renovations and boundary transition plan contingent on bonding capability and timing of projects
- Boundaries could be modified to create flexible/transition areas with high transition residential areas to help balance enrollment
- Grandfathering/Transfers/Student Options are determined by Administration – could happen if space allowed

Updated 11/13/23 based on Board input

Demographic Summary

Population

Percent Change of Annual Rate

2000 to 2010: -0.24%

2010 to 2020: 0.53%

2020 to 2023: -0.03%

2023 to 2028: -0.08%

Observations:

Population is forecasted to decrease the next five years

Housing

Percent Change of Annual Rate of Housing Inventory

2000 to 2010: 0.21%

2010 to 2020: -0.08%

2020 to 2023: 0.09%

2023 to 2028: -0.05%

Observations:

Housing development is forecasted to decrease the next five years

Income

Percent Change of Income per Capita

2023: \$31,338

2028: \$35,480

2023 to 2028: 2.47%

Observations:

Income is increasing in the district

Workforce

Unemployment Rate

4% as of July 2023

Observations: Unemployment is higher than the State of Iowa (2.4%)

Demographics

Demographic Overview	Newton Community School District	Grinnell-Newburg School	City of Newton	Jasper County	Iowa

Notes:

- Highest percentage of employees are in Other Services (28.98%); 2nd Highest percentage of are in Health Services (14.62%)
- When compared to neighboring geographies the district has a higher percentage of in Utilities (0.93%) and the lowest in Insurance (0.38%)

Intra-District Transfer Table

Reside	Attend				
	Arthur Elementary	Emerson Hough	Thomas Jefferson	Woodrow Wilson	Attend Total
Aurora Heights	0	17	9	11	37
Emerson Hough	10	0	12	13	35
Thomas Jefferson	7	7	0	10	24
Woodrow Wilson	16	14	15	0	45
Grand Total	33	38	36	34	141

Source: Newton Community School District and RSP

Observations:

- Illustrates school choice that could be impacted by location of educational programming
- Reviewed on an annual basis and approved based on capacity availability
- Emerson Hough ES had the most transferring in (+38), but Thomas Jefferson ES had the largest net gain of students (+12)
- Woodrow Wilson ES had the most transferring out (-45) and the largest net loss of students (-11)
- Over 140 total elementary students attended a school where they do not reside this year

NOTE: The schools in the left column are associated with the current attendance area. Reading to the right indicates a school choice change from where they are assigned based on the Reside attendance area.

For example: Aurora Heights has 37 students attending a different elementary school and 33 students from another elementary school choosing to attend Aurora Heights. This results in a 4 less students attending Aurora Heights than what reside in that attendance area.

Definitions

- Cohort: a group of individuals having a statistical factor (such as grade level) in common in a demographic study
- Out-migration: shows number of students in grade Kindergarten to 11th that are attending the district in the previous year, but were not attending the district in the current year
- In-migration: shows number of students in grade 1st to 12th that are attending the district in the current year, but were not attending the district in the previous year
- Yield-rate: ratio of students that attend each school to the number of housing units in that school's attendance area
- Single-family: a house that is may be fully detached or semi-detached occupied by one household or family
- Multi-family: a classification of housing where multiple separate housing units for residential inhabitants are contained within one building or several buildings within one complex
- Town Homes: Side by side housing units that do not meet the definition of single-family houses
- Mobile Home Park: movable dwelling, 8 feet or more wide and 40 feet or more long, designed to be towed on its own chassis, with transportation gear integral to the unit when it leaves the factory, and without need of a permanent foundation.
- Vacant Land: means any undeveloped land/ erf within a proclaimed township or a land development area and will continue to be rated as vacant until such time as a certificate of occupancy
- Mixed-use development: development that blends two or more residential, commercial, cultural, institutional, and/or industrial uses
- Median Year Built: equal to the middle point of all reported years when each dwelling unit was built based on information from the local assessor's office
- Median Home Value: equal to the middle point of all reported home values from the assessor's office in the district
